

Fika

Designed by AllSfär and grown by
Magical Mushroom Company®

Mycelium acoustic wall tile

FIKA is a revolutionary new acoustic wall tile made from mycelium and hemp. Mycelium is a totally natural root-like structure of a fungus and industrial hemp is increasingly being grown as a more sustainable material option. FIKA tiles have been designed by our in-house designers and are grown exclusively for us by leading mushroom packaging manufacturer, Magical Mushroom Company® here in the UK.

Feature

- ▶ Made from totally natural materials mycelium and hemp
- ▶ 100% Biodegradable (Biodegradable Product Institute Certified)
- ▶ Declared Red-List free
- ▶ VOC free
- ▶ Aldehyde free
- ▶ Designed in-house and grown in the UK exclusively for AllSfär
- ▶ Range of striking angular and curved designs available
- ▶ Easy to install with an aluminium z channel
- ▶ Tiles can be rotated on site to create different designs
- ▶ Available in a range of colour to match scheme colour palette and soft furnishings
- ▶ NRC 0.6 (based on most recent manufacturer's testing)

Designs

FIKA DART

FIKA ZEN

FIKA PENTA

Easy to install with
aluminium Z channel

Colours

* Please include the colour you require with your request.

FIKA is a natural product and there may be colour variations from tile to tile and batch to batch if you opt for the natural finish.

For other colours we use an eco-friendly, biodegradable clay paint.

The magic of mycelium...how is FIKA made?

FIKA tiles are grown from a living organism, mycelium.

Process overview

Steps

<p>The trays are filled with hemp hurds and mycelium and grown for 4 days</p>	<p>→ The growth parts are removed from the tray and then allowed to grow for a further 2 days to create a velvety overgrowth</p>	<p>→ These are then dried to disable any future growth</p>	<p>→ The tiles are popped out of the moulds and are ready to be painted and finished ready for easy installation</p>	<p>→ The wall tiles are completely biodegradable at the end of their product life</p>

GUARANTEES

Allsfär guarantee its products against material or manufacturing faults. At Allsfär's sole discretion, Allsfär will repair or replace with comparable materials any product or component which fails under normal use in a single shift environment as a result of a defect in the materials or workmanship. A five-year manufacturer's guarantee applies to ÖRA wall coverings and DIFFUSE acoustic furniture. Allsfär also offer a two-year guarantee on all moving parts. The full Warranty Policy is available on request from Allsfär Customer Services.

SPECIFICATIONS

Whilst every care is taken to ensure accuracy, all dimensions are approximate and, as a consequence, Allsfär cannot be held responsible for errors. As part of our policy for continued improvement Allsfär reserve the right to make any changes, without notice, to specifications or designs that it considers reasonable. Any such changes will not affect the validity of the contract.

CLEANING

Mycelium tiles have a relatively delicate surface, so it won't be suitable for aggressive chemicals / wet cleaning, despite being water-repellent. We recommend the softest type of dry dusting similar to thin fibre brushes applied without any pressure to the material. A feather duster would ideal and please avoid anything with a cloth finish or the overgrowth will be rubbed off over time .
